The key to winning the game of life isn’t money, a prestigious degree, or even keeping up with the Kardashians. The latest science reveals that the key is High Status—the secret sauce that has enabled the world’s most successful people to achieve the life of their dreams in no time at all.

Jason writes pretty early on in this book with I get a lot of labels thrown at me—teacher, guru, marketer, speaker. Others just call me a world-class salesman with nothing to offer. Count me in with the latter sentence. This book is supposed to be the book version of his Status program. At one point I remember that program in particular was being sold for 1000 dollars online. I hope that program wasn’t nearly as underwhelming as this book is. Basically, he’s looked at the Definitive Book of Body Language and Amy Cuddy. Additionally, he’s rather well versed in reading about millionaires and billionaires high status. He doesn’t give much, if any, annotation to many of the stories he recounts for these historical figures. I knew about many of them because I’m reasonably well read myself. However to the average reader, you would hope for some footnotes. His body language ideas are not new by any means and could be found either in the book listed above or online.

That being said, he does have a decent exercise regarding vocal tonality I hadn’t seen before and the book is written fairly well. But perhaps the greatest flaw in Higher Status is his chapter on High-Status Truth. The chapter isn’t bad for what it tells but for what it leaves out. On Joe Rogan’s podcast with Dan Pena, Pena reveals that Jason Capital is not the author’s name and that it is a big secret. Well if you just do a little digging his actual name is likely, unless he’s since changed it, Alex Maroko. How’s that for high status honesty? Why does he hide this? For marketing. But to me, what’s very revealing is that he chooses Jason Capital of all names. My own personal theory? He wants to remind himself everyday that he’s chasing capital and never forget it. That he created a very devoted following selling mostly a rehash of existing information for top dollar is remarkable to me. To that end, the paperback version of this book is 19.95! If you want a MUCH better book regarding relationships and body language read Mark Manson’s Models for half the price.
